LeetCode | CodeChef | Codeforces

Education

Course	Institute Name	University / Board	Year of Passing	Score (%/CGPA)	Course Type
B.Tech – CSE (UG)	KI University, Vijayawada	KI University	2027 (Expected)	8.9 CGPA	Full-Time
12th (HSC)	Mahatma Gandhi Jr. College	Maharastra State Board	2023	78.17%	Full-Time
10th (SSC)	Bal Vidya Mandir	Maharastra State Board	2021	97.6%	Full-Time

Technical Skills

Languages: C, Java, JavaScript, Python
Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Socket.IO, Prisma ORM
Databases: SQL, MongoDB
Tools: Git, Docker, Jenkins, Vercel, Render

Strong Subjects

Data Structures & Algorithms • Object-Oriented Programming (OOP) • Database Management Systems (DBMS) • Operating Systems

Projects Undertaken

Lab Management System 2025 – Present
*Node.js, Express.js, JavaScript, React.js, MongoDB, Prisma, Socket.IO, JWT — **Live Demo*** *Personal Project*
- Architected and developed a full-stack laboratory management platform with role-based workflows for doctors, technicians, and administrators, supporting patient registration, test ordering, payment tracking, report management, and administrative operations.
- Built secure RESTful APIs using Express and JavaScript with JWT authentication, role-based authorization, request validation, centralized error handling, and reusable middleware to ensure secure and maintainable backend services.
- Integrated Socket.IO for real-time notifications and dashboard updates using JWT-authenticated, room-based communication, enabling instant workflow synchronization across different user roles.
- Designed the backend using Prisma ORM with MongoDB, implementing soft-delete functionality, audit logging, global search, file upload support, PDF report generation, email notifications, and a scalable modular architecture for long-term maintainability.

CampusEdge – Campus Recruitment Platform 2024 – 2025
*React.js, Node.js, Express.js, MongoDB, JWT — **Live Demo*** *Personal Project*
- Designed and developed CampusEdge, a full-stack campus recruitment platform that helps students explore placement opportunities and supports recruitment-related activities through a responsive web interface.
- Built and integrated frontend and backend components using React.js, Node.js, and Express.js, following a modular architecture for maintainable application development.
- Implemented database-driven functionality using MongoDB and developed RESTful APIs to support application data management and seamless communication between the frontend and backend.
- Developed a responsive user interface and deployed the application using Vercel, gaining practical experience in full-stack development, debugging, API integration, and production deployment.

Grocery Store Application 2023 – 2024
Python, Flask, React.js, SQL, Agile Methodology, SDLC *Academic Project*
- Delivered the application via an Agile sprint-based workflow, iterating on features based on stakeholder feedback each cycle, mirroring industry-standard SDLC practices.
- Developed a secure CRUD backend with structured SQL data models, ensuring data integrity, efficient inventory management, and reliable order processing.
- Collaborated with team members to design UI components in React.js and integrate the frontend with Flask REST APIs, maintaining clean separation of concerns.

Certifications

- **MongoDB Associate Developer – Node.js** — MongoDB University *Verified | university.mongodb.com*

Achievements & Leadership

- **Dual Degree – IIT Madras (IITM):** Completed the Foundation Level in under 1 year, covering statistical analysis, data pipelines, and large-scale dataset processing.
- **Autonomous Vehicle Prototype Lead:** Led end-to-end development of an autonomous vehicle prototype, managing design, development, testing, and root-cause analysis of system failures across the full SDLC, improving prototype stability and reliability through data-driven mitigations.
- **Hackathon Participant:** Collaborated in a college hackathon to design and deliver an innovative solution under strict time constraints, demonstrating teamwork and rapid prototyping skills.
- **Event Organizer:** Organized and managed an online gaming event end-to-end, coordinating stakeholders, logistics, and participant experience.
- **Competitive Programmer:** Active on LeetCode, CodeChef, and Codeforces, consistently practicing data structures and algorithms (DSA) to strengthen problem-solving skills.
